Technowood SoftNAV Catheter

Saito Type

LCA & RCA with one (1) catheter

Japanese Red Cross Hamamatsu Hospital
Department Of Cardiology
Kei Tawarahara, M.D., Interventional Cardiologist

SoftNAV Catheter, Saito Type Highlights, LCA & RCA with one (1) catheter

Hydrophilic coating helps facilitate smooth navigation in tortuous vessels.

Coaxial engagement into coronary artery is very easy due to a slightly outward distal tip.

A second curve on distal shaft is specifically designed to maintain contact on the aorta wall and this provides definite back-up support allowing stable catheter positioning.

Radiopaque distal tip provides visual assurance for safe navigation.

Large inner lumen produces excellent angiography.
